SUMMARY

Master's student in Computer Science at Indiana University with experience in **software development and web technologies**. Skilled in building practical, user-friendly solutions and eager to contribute technical expertise and problem-solving abilities to software engineering teams.

EDUCATION

Indiana University, Luddy School of Informatics, Computing and Engineering — Indiana, USA
Master of Science in Computer Science, GPA: 3.717 — August 2024 -May 2026
Relevant Coursework: Applied Algorithms, Software Engineering, Computer Networks.

Poojya Doddappa Appa College of Engineering — Kalaburagi, INDIA
Bachelors in Computer Science and Engineering, CGPA: 8.27 — August 2019 – July 2023
Relevant Coursework: Python, Artificial Intelligence, Cloud Computing, Database Management

TECHNICAL SKILLS & CERTIFICATION

Programming Languages: Python, Java, C, Dart, JavaScript, C++, HTML, CSS, Flutter, React, Node.js
Backend Technologies: Springboot , REST APIs, Microservices
Databases: PostgreSQL, MySQL, SQL Server,MongoDB, Cassandra, Neo4j
Tools & Platforms: Git, GitHub, Docker, Kubernetes, Terraform, Postman, Render, VS Code, Figma, IntelliJ, Jira,.NET,CI/CD
Cloud & Deployment: AWS (EC2, S3),Azure
Concepts & Others: Object-Oriented Programming, Data Structures & Algorithms, Problem solving, Scrum, Kanban
Certification: NPTEL IoT & Entrepreneurship, Microsoft & SAP AI, JSpiders Core Java & Web Tech

WORK EXPERIENCE

Y STEM and Chess Inc. — Idaho, USA
Full Stack Developer Intern — July 2025 – August 2025

- Redesigned key UI components, boosting site usability and user engagement by 20% overall.
- Implemented and delivered 8+ responsive React.js pages, reducing mobile bounce rate by ~25% and improving Lighthouse performance scores to 90+.

ASIMITH — Kalaburagi, INDIA
UI/UX Intern — February 2023 – May 2023

- Designed 15+ high-fidelity mobile health app screens in Figma, integrating Lottie animations that improved prototype engagement time by 30% during usability testing.Conducted 5+ user tests and research sessions to validate and refine designs for usability.

Azurite EduTech Private Limited — Kalaburagi, INDIA
Software Developer Intern — May 2022 – October 2022

- Crafted 12+ dynamic Flutter Web forms using MVVM (stacked architecture), reducing form submission errors by 35% and improving state efficiency across modules.
- Produced secure login/signup flows using custom widgets, Dart language, and Firebase backend integration.

PROJECTS

Secure Digital Identity Using NFTs

- Built and deployed 3 Ethereum smart contracts using Solidity, enabling minting and transfer of NFT-based identity tokens with 100% on-chain verification.Gained deep understanding of NFTs, enabling the creation, minting, and trading of digital assets within the application.
- Developed interactive React-based frontend integrating MetaMask wallet, enabling seamless NFT minting and real-time blockchain transaction tracking.Integrated Web3.js to connect frontend with Ethereum testnet, reducing transaction latency by 20% through optimized async calls.
- The paper based on this project was published in the 5th International Conference on Inventive Research in Computing Applications (ICIRCA) at IEEE, Aug'23.

Event Management System

- Created an event management system enabling students to browse and register for workshops and seminars with role-based access (super admin, faculty, student) for secure authentication. Hosted the application on AWS EC2, ensuring global accessibility and scalability.
- Architected PostgreSQL schema on AWS RDS with indexed queries, improving data retrieval speed by 40% under concurrent load testing.
